Reviews in Pure and Applied Pharmacological Sciences. Vol.2, 372-375 (1981)

INDEX: Volume 2

A

adenosine 63
adenylate cyclase 67
adipose tissue 1
aminopyridines – actions on and/or 318
  autonomic nervous system and on autonomically innervated tissues 323
    cardiovascular system 334
    heart 330
    parasympathetic neuroeffector junctions 3
    sympathetic ganglia 329
    sympathetic neuroeffector junctions
  central nervous system 318
  excitable membranes 344
  mechanism of action of 347
  neuromuscular transmission and on transmission to electric organs 336
    antagonism of neuromuscular blocking agents 337
    beneficial effects in neuromuscular disorders 340
    botulism 341
    Eaton-Lambert syndrome 340
    myasthenia gravis 340
  skeletal muscle contractility 342
  therapeutic potential 354
aminone 318
analgesia 115
analysis of variance 266
anti-curare agents 318

B

botulism 341
Bowman, W.C.: from Bowman, W.C. and Savage, A.O.: Pharmacological actions of aminopyridines and related compounds 318
Buckett, W.R.: The role of GABA in analgesia and drug dependence 115
Burstein, S.: from Burstein, S. and Hunter, S.A.: The biochemistry of the cannabinoids 155

C

calcium 58
cannabinoids and 156
  alterations in biogenic amine levels 158
  effects on acetylcholine metabolism 157
  effects on carbohydrates 185
  effects on cyclic-AMP 195
  effects on lipids 188
    cholesterol and cholesterol esters 189
    fatty acids 188
    phospholipids 189
    prostaglandins 193
    steroids 192
    triglycerides 192
  effects on metabolism of other drugs 166
  effects on nuclear processes 162
  endocrinological effects 169
    androgens 169
    corticoids 181
    estrogens 175
    gonadotropins 183
    growth hormone 183
    thyroid hormone 183
  interactions with other enzymes 166
    adenosine triphosphatases 167
    monoamine oxidases 166
    NADH oxidase 168
  uptake, release and synthesis of neurotransmitters 160
cell cycle 143
competence point 226
computer program 226
cyclic 3′,5′-AMP 9,10,49,51,51
  effects of cannabinoids on 195
cyclic 3′,5′-GMP 22,58

D

dantrolene sodium 318
Davies, J.I.: from Davies, J.I. and Souness, J.E.: The mechanisms of hormone and drug actions

Reviews in Pure and Applied Pharmacological Sciences. Vol.2, 372-375 (1981)

INDEX: Volume 2

A

adenosine 63
adenylate cyclase 67
adipose tissue 1
aminopyridines – actions on and/or 318
  autonomic nervous system and on autonomically innervated tissues 323
    cardiovascular system 334

Burstein, S.: from Burstein, S. and Hunter, S.A.: The biochemistry of the cannabinoids 155

C

calcium 58
cannabinoids and 156
  alterations in biogenic amine levels 158
  effects on acetylcholine metabolism 157
  effects on carbohydrates 185
  effects on cyclic-AMP 195
  effects on lipids 188
    cholesterol and cholesterol esters 189
    fatty acids 188
    phospholipids 189
    prostaglandins 193
    steroids 192
    triglycerides 192
  effects on metabolism of other drugs 166
  effects on nuclear processes 162
  endocrinological effects 169
    androgens 169
    corticoids 181
    estrogens 175
    gonadotropins 183
    growth hormone 183
    thyroid hormone 183
  interactions with other enzymes 166
    adenosine triphosphatases 167
    monoamine oxidases 166
    NADH oxidase 168
  uptake, release and synthesis of neurotransmitters 160
cell cycle 143
competence point 226
computer program 226
cyclic 3′,5′-AMP 9,10,49,51,51
  effects of cannabinoids on 195
cyclic 3′,5′-GMP 22,58

D

dantrolene sodium 318
Davies, J.I.: from Davies, J.I. and Souness, J.E.: The mechanisms of hormone and drug actions

on fatty acid release from adipose tissue 1
drug dependence 115
drug interactions 115

E

Eaton-Lambert syndrome 340
energy status 23
epilepsy – pre-disposition to 293
esterification 6

F

fatty acids 5
fatty acid releasing system – components of 5
esterification system 6
lipolytic system 8
cyclic-AMP generating system 10
link to cyclic-AMP 9
lipases 8
non-esterified fatty acids translocation system 6
Fukui, N.: from Miura, Y. and Fukui, N.: Platelet-derived growth factor and liver regeneration – review 143

G

gamma-aminobutyric acid (GABA) 115
agonists 120
analgesic drugs on GABAergic neurochemistry 116
antagonists 122
antinociceptive actions of compounds which affect GABAergic function 124
baclofen (on) – 128
benzodiazepine derivatives (on) – 128
morphine on GABAergic chemistry 166
morphine tolerance and dependence 127
acquisition of morphine tolerance and dependence 127
influence of GABAergic drugs on morphine withdrawal 127
morphine withdrawal on GABA levels 128
narcotic antagonists (on) – 119
synthesis inhibitors (of GABA) 122
transaminase inhibitors (of GABA) 121
uptake inhibitors (of GABA) 122
GABAergic drugs 115
glutamate 294

H

hormone and drug actions 70
on esterification systems 70
on translocation system 70
hormone receptors 14
Hunter, S.A.: from Burstein, S. and Hunter, S.A.: The biochemistry of the cannabinoids 155

K

ketamine 318

L

Lewi, P.J.: Multidimensional analysis of pharmacological data 226
lipolysis 1
lipolytic system 14
apparatus for its endocrine control 14
hormone-receptor interactions 14
adrenergic receptors 14
adrenocorticotrophin (ACTH) receptors 16
glucagon receptors 15
glucacorticoid (intracellular) receptors 18
histamine receptors 15
insulin receptors 17
luteinizing hormone receptors 17
oxytocin receptors 18
parathyroid receptors 17
secretin receptors 16
thyroid stimulating hormone receptors 16
vasoactive intestinal polypeptide (VIP) receptors 16
apparatus for its local modulation 27
adenosine system 33
feedback regulator 32
non-esterified fatty acids (NEFA) 27

hormone and drug actions on 63
adenosine system 63
adenosine analogues and the adenosine receptors 64
drugs affecting adenosine metabolism 66
hormones and the adenosine receptor-adenylate cyclase interaction 67
calcium and cyclic-GMP 59
cyclic-AMP compartmentation 51
cyclic-GMP and redox 59
ascorbate 59
general 59
oxidase substrates 61
thiol-containing agents 60
thiol-oxidizing agents 61
hormone-sensitive lipase 54
interactions with the Ca^{++} system 54
alpha-adrenergic agents 57
insulin 55
lipolytic hormones 55
local anesthetics 55
prostaglandins 56
sulphonylurea derivatives 56
occupation of hormone receptors 37
alpha-adrenergic receptors 37
beta-adrenergic receptors 40
phosphodiesterase activity 45
cyclic-AMP analogues 48
fast-acting lipolytic hormones 47
insulin 46
methylxanthines 49
papaverine 50
slow-acting lipolytic hormones 47
protein kinase activity 52
cyclic-AMP and its analogues 52
fast-acting lipolytic hormones 51
insulin 52
other drugs 53
slow-acting lipolytic hormones 52
receptor abundence 41
adrenal steroids 43
drugs 43
general 41
thyroid hormones 42
receptor-adenylate cyclase interaction 43
adrenal steroids 44
cholera toxin 44
guanine nucleotides 45
thyroid hormones 43
receptor occupation and adenylate cyclase modulation 19
receptor occupation and other effects 20
calcium system 21
cyclic-GMP system 22
energy status 23
redox status 24
redox and energy 62

M

marihuana 155
Miura, Y.: from Miura, Y. and Fukui, N.: Platelet-derived growth factor and liver regeneration – review 143
multivariate statistics 226
myasthenia gravis 318

N

neuroleptics 226
neuromuscular transmission 318

P

pharmacology 226
phencyclidine 318
phosphodiesterase 45
platelets 143
localization of serum growth factor in 144
physiological function of 145
platelet-derived growth factor 143
fate of in body 147
liver regeneration and 150
mode of action of 150
purification of 146
principal components 226
prostaglandins 56,68,143,193

R

redox 51

S

Savage, A.O.: from Bowman, W.C. and Savage, A.O.: Pharmacological actions of aminopyridines and related compounds 318
serum growth factor in platelet 144
Souness, J.E.: from Davies, J.I. and Souness, J.E.: The mechanisms of hormone and drug actions on fatty acid release from adipose tissue 1
spectral map 226
steroids 43,192

T

tacrine 318
tetrahydrocannabinol 155
thromboxane 143
thyroxine 17,43

V

Van Gelder, N.M.: The role of taurine and glutamic acid in the epileptic process: a genetic predisposition 293
